

KARTHIK KUMAR KUNDUN SHEKAR

Sr. Technical Product Manager – Enterprise Data Platform Transformation, Data Engineering & Reporting Solutions

Seattle, WA | H1B Visa – Sponsorship Required | 415.815.6723 | karthik.kumar385@gmail.com | [LinkedIn](#)

Professional Summary

Senior Technical Product Manager and Solution Architect with 18+ years of experience delivering complex **data engineering, reporting, ERP, and cloud platform solutions** across Supply Chain, Finance, and Enterprise Data domains. Expert at defining product vision, translating business requirements into technical specifications, and driving engineering execution across large cross-functional teams.

Demonstrated success in **data platform modernization, big-data integrations, reporting/analytics solutions, and enterprise-scale digital transformation**. Strong background collaborating with engineering, architecture, design, and business stakeholders to deliver scalable, high-performance data products.

Core Competencies

- Product Strategy & Road Mapping
 - Data Engineering & Big Data Solutions (Spark & Databricks)
 - Data Architecture & System Design
 - Supply Chain & Finance Functional Expertise
 - Analytics / Reporting Platforms (Power BI, Incorta)
 - Cloud Platforms (Azure)
 - ETL/ELT Pipelines, Data Modeling, Data Governance
 - Technical Requirements & Acceptance Criteria
 - Agile Delivery, Cross-Team Planning, Feature Prioritization
 - Technical Documentation & Data Flow Specification
 - Stakeholder Management & Executive Communication
 - Mentoring & Technical Leadership
-

Certifications

- External Certifications:
 - **AZ-900**: Microsoft Azure Fundamentals
 - **DP-900**: Microsoft Azure Data Fundamentals
 - **98-381**: Introduction to Python Programming
 - Oracle Fusion Cloud Applications ERP Process Essentials Certified
 - Databricks Fundamentals, Data Engineering, AI Agent & Generative AI Accreditations
-

Technology Proficiencies

- **Cloud:** Azure, Azure Databricks, Databricks SQL, Azure SQL
 - **ERP / Supply Chain / Finance:** Oracle EBS R12, Oracle Cloud ERP, O9, OTM, ASCP
 - **Languages:** SQL, Python, PySpark, PL/SQL, Java, C/C++
 - **Reporting:** Power BI, Incorta, Databricks SQL Warehouse
 - **Tools:** Jira, Confluence, Git, ServiceNow
 - **Big Data:** Spark, Delta Lake, Hadoop
 - **Other:** Data Lake Architectures, Data Warehousing
-

Professional Experience

Technical Solution Architect

Infosys Limited (Client: Starbucks Corp)

NextGen Loyalty Systems – Data platform| Nov 2025 – Present

- Led product planning, feature shaping, and end-to-end solution definition for integrating NextGen Loyalty into enterprise data pipelines.
- Defined technical requirements, acceptance criteria, data flows, and system architecture for ingestion, transformations, and reporting.
- Collaborated with engineering, architects, and business stakeholders to scope features, resolve dependencies, and remove technical blockers.
- Ensured engineering teams had complete endpoint, input/output, and integration specifications for development.
- Drove validation of features against business KPIs, customer experience goals, and performance metrics.

Technical Solution Architect

Infosys Limited (Client: Macy's Corp)

Capital Projects Transformation - ERP | Mar 2025 – Oct 2025

- Prepared pre-sales pitch, conducted POC demo and kick started the project module implementation.
- Designed Macy's Capital Project accounting process using Oracle EBS Projects Costing, improving project financial visibility.
- Designed solution to integrate Oracle EBS with Autodesk Construction Cloud, enhancing project management and financial accuracy. First-in Class integration of Oracle EBS with SaaS Autodesk Construction Cloud.

Technical Solution Architect

Infosys Limited (Client: Starbucks Corp)

Licensee Stores Tech - Solstice - Data platform| May 2024 – Feb 2025

- Owned the roadmap and technical direction for Licensee Store reporting, real-time royalty invoicing, and financial analytics.
- Designed scalable data pipelines, Databricks SQL warehouse models, and dashboarding capabilities.
- Increased reporting accuracy and reduced processing time by optimizing ingestion pipelines and refactoring data transformations.

Technical Solution Architect

Infosys Limited (Client: Starbucks Corp)

Supply Chain Finance Transformation - Data Engineering platform| Oct 2023 – Apr 2024

- Defined technical specs and guided engineering on a data-driven supply chain finance optimization product.
- Designed data models, ETL pipelines, and dashboards supporting Total Landed Cost analytics.
- Presented solutions to Finance Directors and VPs, driving alignment across Finance, Supply Chain, and Data teams.

Technical Solution Architect

Infosys Limited (Client: Starbucks Corp)

Revenue Accounting & Cash Management System – Data platform| Apr 2022 – Sep 2023

- Spearheaded architecture and delivery of a unified revenue accounting platform on Azure & Databricks.
- Oversaw data conversion strategy, lineage documentation, and compliance workflows.
- Led product planning, feature shaping, and end-to-end solution definition for integrating Revenue Accounting into enterprise data pipelines.
- Defined technical requirements, acceptance criteria, data flows, and system architecture for ingestion, transformations, and reporting.
- Collaborated with engineering, architects, and business stakeholders to scope features, resolve dependencies, and remove technical blockers.
- Ensured engineering teams had complete endpoint, input/output, and integration specifications for development.
- Drove validation of features against business KPIs, customer experience goals, and performance metrics.

Technical Solution Architect

Infosys Limited (Client: Starbucks Corp)

Rewards Management system – Data platform| Sep 2021 – Mar 2022

- Defined product requirements and drove development for rewards validation, liability modeling, and cross-system integrations.
- Coordinated integration with upstream UCP-R systems and validated reward generation logic.

System Engineer| Technology Lead |Technology Architect

Infosys Limited (Client: Multiple Clients)

Oracle E-Business Suite and Integration Systems – ERP | 2007 – 2021

- Delivered large-scale **Oracle EBS implementations and upgrades**, covering Financials, Procurement, Inventory, Warehouse Management and Costing modules, improving operational efficiency for global enterprises.
- Managed critical **post-implementation support** for Oracle EBS systems, addressing user queries, troubleshooting integrations, and providing continuous improvements to meet evolving business needs.

- Led managed services cross-functional teams for **ERP transformations, Oracle EBS Implementation, Oracle EBS Technical Upgrade** and **support initiatives**, ensuring timely issue resolution, minimal downtime, and adherence to SLAs.
 - Consistently improved operational efficiency through process automation, data quality enhancements, and reporting optimization.
 - Spearheaded **system integrations** between Oracle EBS and third-party solutions, enhancing financial accuracy and automating supply chain workflows.
 - Acted as the primary bridge between business operations and engineering teams to define system requirements, technical architecture, and integration roadmaps.
 - Drove adoption of analytics solutions using BI Apps, Incorta, and Power BI.
-

Pre-Sales Expertise

- Converted enterprise RFPs into multimillion-dollar wins by defining solution architectures and conducting POCs.
 - Presented solution blueprints to senior leadership, showcasing data workflows, reporting constructs, and integration patterns.
 - Developed initial product frameworks, technical roadmaps, and estimation models for digital transformation programs.
-

Education

- **Foundation Program in Computer Science**
Infosys Global Education Center, Mysuru, India | 4.92 GPA
 - **Bachelor of Science**
Bangalore University, Bangalore, India | First Class
